## **Stairmaster 1650 LE Crossrobics**

**Price: \$1 699.00**

The Crossrobics 1650 LE delivers an exceptional workout, allowing an individual to engage in both aerobic conditioning and strength training at the same time. The recumbent position supports the back and eliminates stress on the hips and knees. Using this product can be compared to using the Stairmaster StairClimber. The Crossrobics 1650LE is also virtually maintenance-free: it requires only occasional lubrication for maintenance.

### **Specifications:**

Height: 72 in. (183 cm) Length: 64.5 in. (164 cm) Width: 41 in. (104 cm) Weight: 425 lbs. (193 kg) Utilizes Any Standard Outlet

This Stairmaster Crossrobics 1650 LE is in perfect working condition and has been fully remanufactured. Our Remanufacturing & Refurbishing process is basically separated into four (4) stages from the time eOn Fitness has initially tested, inspected and inventoried each and every unit that enters our facility.

**Disassembly** - Each unit is completely disassembled down to the bare frame including all wiring and harness assemblies. We check and test all parts as we remove them and note what needs to be replaced and ordered from the manufacturer or third-party (OEM) supplier.

**Sand Blast/Powder Coating** - Once we have completely disassembled the units, we then have them sand blasted to the original steel and then powder coated to your specific color. We use the latest technology for this process to eliminate any

imperfections in the steel and prevent discolor or bubbling in the powder coat. This process is very important when completing the powder coating and sealing to prevent rust from accumulating and eventually eat through the steel.

**Assembly** - Assembly is also very important and is necessary to test all parts as they are placed back to their original place. eOn Fitness will use only manufactured or OEM parts during this stage to ensure the best operation unless specific parts are not made specifically by the manufacturer. All electronics, wires, overlays, decals, operational decals, pin striping and all moving parts including bearings, belts, motors, bushings, rollers, cables, pulleys, upholstery and other main parts are replaced where necessary with manufacturer or OEM parts. This important stage is crucial and when completed correctly, a remanufactured unit is restored to the original and oftentimes even superior condition, as we ensure with all of our products here at eOn Fitness.

**Completion/ Testing** - This last stage is our final testing period where we detail and test every unit to ensure flawless operation upon arrival at its destination. The end result is typically a used machine that functions and looks like a brand new unit, but sells for much less.

### **Shipping Charges:**

Free Delivery anywhere in California with main floor set up.

We provide the lowest and most competitive shipping rates in North America, including Canada & Mexico. No handling fees.

Shipping quotes are available for free by email or by calling our shipping department at:
