Cybex Pro Plus Treadmill

Price per Unit (piece): \$3 299.00

You are looking at an excellent example of a Remanufactured Cybex Pro Plus Treadmill. The Cybex Pro + provides an easy to use treadmill and the precise amenities demanded. The Cybex Pro+ combines an innovative design with basic functionality to meet the needs of physiotherapy, sports and rehab facilities. High quality features include a low step-up height, a Safety Sentry™ which senses use and returns treadmill to rest when unattended, an elevation system that retracts into the frame for a clean, and covered drive belt edges to offer increased safety and to prevent fraying and wear. Solidly built and good looking, also perfect for home use.

Cybex Treadmill Features and Specifications:

Width/Length: 32" W x 79" L Max User Weight: 400 lbs Power: 115V Motor: 3.0HP DC Continuous duty with radial cooling fan and a high efficiency Pulse Width Modulated (PWM) controller

This Cybex Pro Plus Treadmill is in perfect working condition and has been fully remanufactured. Our Remanufacturing & Refurbishing process is basically separated into four (4) stages from the time eOn Fitness has initially tested, inspected and inventoried each and every unit that enters our facility.

Disassembly - Each unit is completely disassembled down to the bare frame including all wiring and harness assemblies. We check and test all parts as we remove them and note what needs to be replaced and ordered from the manufacturer or third-party (OEM) supplier.

Sand Blast/Powder Coating - Once we have completely disassembled the units, we then have them sand blasted to the original steel and then powder coated to your specific color. We use the latest technology for this process to eliminate any imperfections in the steel and prevent discolor or bubbling in the powder coat. This process is very important when completing the powder coating and sealing to prevent rust from accumulating and eventually eat through the steel.

Assembly - Assembly is also very important and is necessary to test all parts as they are placed back to their original place. eOn Fitness will use only manufactured or OEM parts during this stage to ensure the best operation unless specific parts are not made specifically by the manufacturer. All electronics, wires, overlays, decals, operational decals, pin striping and all moving parts including bearings, belts, motors, bushings, rollers, cables, pulleys, upholstery and other main parts are replaced where necessary with manufacturer or OEM parts. This important stage is crucial and when completed correctly, a remanufactured unit is restored to the original and oftentimes even superior condition, as we ensure with all of our products here at eOn Fitness.

Completion/ Testing - This last stage is our final testing period where we detail and test every unit to ensure flawless operation upon arrival at its destination. The end result is typically a used machine that functions and looks like a brand new unit, but sells for much less.

Shipping Charges:

Free Delivery anywhere in California with main floor set up. California customers, please provide coupon code for free shipping.

We provide the lowest and most competitive shipping rates in North America, including Canada & Mexico. No handling fees.
