Precor EFX 5.23 Elliptical

Price per Unit (piece): \$2 499.00

You are looking at an excellent example of a Used Precor EFX 5.23 Elliptical Fitness Crosstrainer. This unit is in excellent condition, runs smoothly and quietly, and cosmetically in like new shape.

The unique elliptical motion of the Precor EFX 523 minimizes impact to your joints and lower back while exercising the muscles of your lower body, the key to effective aerobic exercise. Minimizing impact makes workouts on the [Precor EFX 5.23](#) <!--[if !vml]-->

<!--[endif]--> seem easier than other aerobic exercises - this invites more vigorous exercise for better, quicker results.

So easy to use, just get on and go. The Precor EFX 5.23 closely simulates natural movement, so you're comfortable from the moment you start exercising. The exclusive CrossRamp® Technology allows you to change the angle of the ramp, targeting and cross training different lowerbody muscle groups, including quadriceps, glutes, hamstrings, and calves. The Precor EFX 523 works in both forward and reverse so you can simply change pedaling direction to target different muscle groups.

Resistance: 1 to 20 levels Reading Rack & Accessory Tray Stride Length: 18" Dimensions: L 75" x W 30" x H 63" Weight: 197 lbs Power Requirements: 110V Outlet (Any Standard Outlet)

Precor EFX 5.23 Elliptical is in perfect condition and has been fully remanufactured. Our Remanufacturing & Refurbishing process is basically separated into four (4) stages from the time eOn Fitness has initially tested, inspected and inventoried each and every unit that enters our facility.

Disassembly - Each unit is completely disassembled down to the bare frame including all wiring and harness assemblies. We check and test all parts as we remove them and note what needs to be replaced and ordered from the manufacturer or third-party (OEM) supplier.

Sand Blast/Powder Coating - Once we have completely disassembled the units, we then have them sand blasted to the original steel and then powder coated to your specific color. We use the latest technology for this process to eliminate any imperfections in the steel and prevent discolor or bubbling in the powder coat. This process is very important when completing the powder coating and sealing to prevent rust from accumulating and eventually eat through the steel.

Assembly - Assembly is also very important and is necessary to test all parts as they are placed back to their original place. eOn Fitness will use only manufactured or OEM parts during this stage to ensure the best operation unless specific parts are not made specifically by the manufacturer. All electronics, wires, overlays, decals, operational decals, pin striping and all moving parts including bearings, belts, motors, bushings, rollers, cables, pulleys, upholstery and other main parts are replaced where necessary with manufacturer or OEM parts. This important stage is crucial and when completed correctly, a remanufactured unit is restored to the original and oftentimes even superior condition, as we ensure with all of our products here at eOn Fitness.

Completion/ Testing - This last stage is our final testing period where we detail and test every unit to ensure flawless operation upon arrival at its destination. The end result is typically a used machine that functions and looks like a brand new unit, but sells for much less.

Shipping Charges:

Free Delivery anywhere in California with main floor set up. California customers, please provide coupon code for free shipping.

We provide the lowest and most competitive shipping rates in North America, including Canada & Mexico. No handling fees.
