Star Trac Pro Recumbent Bike

Price per Unit (piece): \$1 599.00

You are looking at an excellent example of a Remanufactured Star Trac Pro Recumbent Bike. Star Trac's expertise in stationary bike technology makes Star Trac® the leading manufacturer of commercial stationary bikes. For the first time Star Trac® allows you to bring the same smooth, dependable Pro Recumbent bike that you would find in your gym to the convenience of your home.

Star Trac's Pro Recumbent takes stationary biking to a whole new level with approachable, comfort-driven features like our walk-through design, an adjustable reading station, armrests to help alleviate tension in the shoulders, and a wrap-around seat adjust for simple position changes. This bike is made from aluminum which means it simply will never rust. The Pro Recumbent has heart rate monitoring capabilities using a Polar® chest strap or a grip pulse so you'll be able to monitor your heart rate every minute of your work out. The one piece crank with sealed bearings means you'll enjoy smooth and quiet workouts every time.

Say no to the cheap imitations and enjoy the real club quality Star Trac® Pro Recumbent bike right in your home.

Star Trac Recumbent Exercise Bike Features:

Star Trac's Popular Personal Fan creates a more rewarding workout Dynamic Heart Rate Control® adjusts intensity level based on the user's heart rate for interval training User-Friendly Console features cup and accessory holder, reading rack Inline Skate-Style Pedal Straps allow for easier customized adjustment and a more secure hold All Aluminum Frame is an approachable design that is corrosion-resistant Easy-Up Seat Adjust for simple position changes.

This Star Trac Pro Recumbent is in perfect working condition and has been fully remanufactured. Our Remanufacturing & Refurbishing process is basically separated into four (4) stages from the time eOn Fitness has initially tested, inspected and inventoried each and every unit that enters our facility.

Disassembly - Each unit is completely disassembled down to the bare frame including all wiring and harness assemblies. We check and test all parts as we remove them and note what needs to be replaced and ordered from the manufacturer or third-party (OEM) supplier.

Sand Blast/Powder Coating - Once we have completely disassembled the units, we then have them sand blasted to the original steel and then powder coated to your specific color. We use the latest technology for this process to eliminate any imperfections in the steel and prevent discolor or bubbling in the powder coat. This process is very important when completing the powder coating and sealing to prevent rust from accumulating and eventually eat through the steel.

Assembly - Assembly is also very important and is necessary to test all parts as they are placed back to their original place. eOn Fitness will use only manufactured or OEM parts during this stage to ensure the best operation unless specific parts are not made specifically by the manufacturer. All electronics, wires, overlays, decals, operational decals, pin striping and all moving parts including bearings, belts, motors, bushings, rollers, cables, pulleys, upholstery and other main parts are replaced where necessary with manufacturer or OEM parts. This important stage is crucial and when completed correctly, a remanufactured unit is restored to the original and oftentimes even superior condition, as we ensure with all of our products here at eOn Fitness.

Completion/ Testing - This last stage is our final testing period where we detail and test every unit to ensure flawless operation upon arrival at its destination. The end result is typically a used machine that functions and looks like a brand new unit, but sells for much less.

Shipping Charges:

Free Delivery anywhere in California with main floor set up. California customers, please provide coupon code for free shipping.

We provide the lowest and most competitive shipping rates in North America, including Canada & Mexico. No handling fees.
