## Life Fitness 97Te Treadmill

**Price: \$4 499.00**

You are looking at an excellent example of a **Remanufactured Life Fitness 97 Te Treadmill**. This unit comes with manufacturer and eOn Fitness warranty. The Life Fitness 97Te treadmill is identical to the [Life Fitness 97Ti](#) but with better electronics. It has one of the most advanced LCD displays in the market today. It features the E<sup>3</sup> Integrated LCD™ System which has a touch screen technology for easier adjustment of workouts. It is also FM ready and has up to 125 available TV channels to keep your clients entertained during their exercise. The 20"x60" running surface is the standard size of Life Fitness commercial treadmills. It is big enough to make users of all shapes and sizes feel comfortable during their workout. This DX3™ belt and deck system also comes with FlexDeck Shock Absorption System that has 4 extra-large and 4 large Lifespring™ shock absorbers to reduce stress and help prevent injuries on user's joints while running.

### **97 Te Features:**

- Accessory Tray
- Built-in Reading Rack
- Overmolded tubular steel ergo bar
- MagnaDrive™ motor controller
- Polar® Telemetry (chest strap required)
- Lifepulse™ Digital Heart Rate Monitoring
- FlexDeck Shock Absorption System
- Manual, Quick Start Programs
- 28 workout programs with 5 ZoneTraining+™ workouts
- Customized Cool Down
- E<sup>3</sup> Integrated LCD™ System with Touch Screen Technology

- DX3™ Belt and Deck System
- 4 extra-large and 4 large Lifespring™ shock absorbers
- Personal Stereo Holder
- CSAFE-Ready and FitLinxx™ Certified
- Manager's Menu Options
- Flash Programmable
- Numeric Keypad
- Smart Stop System

This Life Fitness 97Te Treadmill is in perfect working condition and has been fully remanufactured. Our Remanufacturing & Refurbishing process is basically separated into four (4) stages from the time eOn Fitness has initially tested, inspected and inventoried each and every unit that enters our facility.

**Disassembly** - Each unit is completely disassembled down to the bare frame including all wiring and harness assemblies. We check and test all parts as we remove them and note what needs to be replaced and ordered from the manufacturer or third-party (OEM) supplier.

**Sand Blast/Powder Coating** - Once we have completely disassembled the units, we then have them sand blasted to the original steel and then powder coated to your specific color. We use the latest technology for this process to eliminate any imperfections in the steel and prevent discolor or bubbling in the powder coat. This process is very important when completing the powder coating and sealing to prevent rust from accumulating and eventually eat through the steel.

**Assembly** - Assembly is also very important and is necessary to test all parts as they are placed back to their original place. eOn Fitness will use only manufactured or OEM parts during this stage to ensure the best operation unless specific parts are not made specifically by the manufacturer. All electronics, wires, overlays, decals, operational decals, pin striping and all moving parts including bearings, belts, motors, bushings, rollers, cables, pulleys, upholstery and other main parts are replaced where necessary with manufacturer or OEM parts. This important stage is crucial and when completed correctly, a remanufactured unit is restored to the original and oftentimes even superior condition, as we ensure with all of our products here at eOn Fitness.

**Completion/ Testing** - This last stage is our final testing period where we detail and test every unit to ensure flawless operation upon arrival at its destination. The end result is typically a used machine that functions and looks like a brand new unit, but sells for much less.
