Cybex 630A Arc Trainer Elliptical

Price per Unit (piece): \$3 299.00

You are looking at an excellent example of a **Remanufactured Cybex 630A Arc Trainer**. Patented Advanced Stride Technology offers a smooth and comfortable ride. Adjustable incline provides variability in the pattern of motion. Low inclines provide a gliding action with modest hip and knee motion while higher inclines provide comparable increases in hip and knee motion. Superior biomechanics allow for high intensity training that places high loads on the muscles with less stress on joints. Resistance range from 0 to 900 watts accommodates a wide variety of users—for those seeking a very low work rate to dedicated athletes demanding an extreme workout.

Cybex Arc Trainer Features & Specifications:

Programs: Quick Start plus Manual, Weight Loss, Cardio, Interval, Hill and Strength Console Features:
Upper Console - Dot matrix graphic of program, Large 1" LED display of distance, calories, METs, strides per minutes, and heart rate. *Lower Console* - LED display resistance and dual function display of time and incline. Built-In Wireless Heart Rate Receiver and Contact Heart Rate Monitoring Split Display Design With Magazine Rack Wheels On Front For Easy Rolling Stride Length: 24" Dimensions: L 81" x W 38" x H 60" Unit Weight: 331 lbs Power Requirement: Self Powered/Battery Operated

This Cybex Arc Trainer is in perfect working condition and has been fully remanufactured. Our Remanufacturing & Refurbishing process is basically separated into four (4) stages from the time eOn Fitness has initially tested, inspected and inventoried each and every unit that enters our facility.

Disassembly - Each unit is completely disassembled down to the bare frame including all wiring and harness

assemblies. We check and test all parts as we remove them and note what needs to be replaced and ordered from the manufacturer or third-party (OEM) supplier.

Sand Blast/Powder Coating - Once we have completely disassembled the units, we then have them sand blasted to the original steel and then powder coated to your specific color. We use the latest technology for this process to eliminate any imperfections in the steel and prevent discolor or bubbling in the powder coat. This process is very important when completing the powder coating and sealing to prevent rust from accumulating and eventually eat through the steel.

Assembly - Assembly is also very important and is necessary to test all parts as they are placed back to their original place. eOn Fitness will use only manufactured or OEM parts during this stage to ensure the best operation unless specific parts are not made specifically by the manufacturer. All electronics, wires, overlays, decals, operational decals, pin striping and all moving parts including bearings, belts, motors, bushings, rollers, cables, pulleys, upholstery and other main parts are replaced where necessary with manufacturer or OEM parts. This important stage is crucial and when completed correctly, a remanufactured unit is restored to the original and oftentimes even superior condition, as we ensure with all of our products here at eOn Fitness.

Completion/ Testing - This last stage is our final testing period where we detail and test every unit to ensure flawless operation upon arrival at its destination. The end result is typically a used machine that functions and looks like a brand new unit, but sells for much less.

Shipping Charges:

Free Delivery anywhere in California with main floor set up.

We provide the lowest and most competitive shipping rates in North America, including Canada & Mexico. No handling fees. We now offer WORLDWIDE SHIPPING!!
